FRONT END DEVELOPER

As a business graduate from Carnegie Mellon University turned front end developer, I use organization and time management to create thoughtfully planned out applications with JavaScript and React. With an interest and tact for design, I have a passion in creating aesthetic UIs for an enhanced experience, frequently wireframing prior to programming to ensure the end product matches the initial vision. I deliver timely results with my detail-oriented work ethic. I also speak three languages, which gives me strong cross-cultural communication amongst teams and with clients.

SKILLS

Technical: JavaScript, ReactJS, ReduxJS, HTML5, CSS3, Bootstrap, Material UI (MUI), Figma, Wireframing, Ruby on Rails, REST API, SQLite, PostgreSQL, GitHub, Heroku, Netlify
Language: Korean (fluent), Japanese (conversational)

TECHNICAL PROJECTS

my travelogue - Github Backend, Frontend | Video Demo
Single-page application (SPA) for users to log and track their past/upcoming trips, equipped with a D-day counter
- Backend created with Rails API, Active Record, PostgreSQL, and Active Model Serializers
- Frontend created with JavaScript, React, Redux, HTML, CSS, MUI, and date-fns
- Utilized React-Router to create 3 client-side routes; React-Modal for forms and showing itineraries; and Redux-Thunk to communicate asynchronously between backend and frontend
- Implemented JWT and localStorage on the client-side, bcrypt on the server-side to ensure secure user authentication

Tableau d'Ambiance - Github Backend, Frontend | Video Demo | Deployed Web App
Picture board SPA, where users can create albums and upload photos
- Frontend created with vanilla JavaScript, HTML, CSS, and Bootstrap
- Configured Active Storage to communicate with Amazon S3 cloud storage for image uploading
- Utilized fetch for backend and frontend to communicate and process requests asynchronously

Pilim - Github | Video Demo | Deployed Web App
Web app for casual movie viewers to create movie lists and review movies all in one place
- Created with Ruby on Rails, ActiveRecord, SQLite, PostgreSQL, HTML, CSS, and Bootstrap
- Rendered frontend with erb (Embedded RuBy) to output pure HTML
- Approached planning with applying a UI/UX design thinking process by creating user stories
- Implemented OmniAuth for Facebook and Google for users to login/signup more easily, along with the bcrypt gem

EXPERIENCE

MEK Review   Palisades Park, NJ
Jr. Counselor of Enrollment and Engagement   06/2020 - 06/2021
- Assisted with various administrative tasks for a local SAT prep school to ensure smooth operations, including registration and billing
- Provided consultations to new/existing students to appropriate programs, communicating with parents and troubleshooting any issues along the way

Japan Society   New York, NY
Human Resources Intern   06/2019 - 08/2019
- Migrated 100+ employee records from paper to digital and updated reimbursement records, working alongside Finance department to ensure timely delivery of checks
- Maintained job postings on various hiring platforms and initially screened resumes to identify strong candidates

EDUCATION

Flatiron School   New York, NY
Full Stack Web Development, Ruby on Rails and JavaScript program   02/2021 - 12/2021

Carnegie Mellon University   Pittsburgh, PA
Bachelor of Science in Business Administration; Minor in Japanese   Graduated, 05/2020
Sponsored Study Abroad Program - Temple University | Tokyo, Japan   01/2018 - 04/2018
